

Rethink Employee Engagement and the Digital Workplace

Supercharge engagement and collaboration, enhance productivity and bring the employee experience to life with an intranet powered by OrchestraCMS

Stantive's OrchestraCMS is the only content and digital experience platform built 100% native on Salesforce. OrchestraCMS helps Salesforce customers create compelling digital experiences for their customers, partners, and employees; uniquely combining content with business data, processes and applications across any channel or device.

Social Collaboration Made Easy

Whether Workplace by Facebook or any other third-party social tool, easily create a seamless omnichannel experience for employees by leveraging our robust APIs to bring your entire suite of social tools into one unified platform.

Improved Employee Productivity and Operational Efficiency

Help break down organizational silos and promote cross-functional collaboration by ensuring a consistent experience across channels. Empower employees to find the content they need, when they need it to drive productivity and boost innovation.

Robust Governance to Manage Scale Across the Enterprise

Leverage robust governance capabilities like publishing workflows and approvals to ensure that all content across your organization's business units is relevant and compliant. Active governance delivers innovation and sustained success by building collaborative opportunities and ensures your team excels in its mission.

A unified, digital hub of collaboration

Leverage powerful business data to target and personalize the right content, to the right employee, at the right time — on any channel or device.

Enterprises have higher aspirations for their next generation of intranets. They are no longer designed simply as internal-facing websites where employees learn of corporate news and access company policies and self-service applications for processes indirectly related to their work.

The digital workplace requires a radical rethinking of the intranet's role, its governance, management, and architecture. Enterprises that fail to adapt their intranet strategies will be swept into the next wave of intranet failure.

Intranets powered by OrchestraCMS

Connect

- Distribute relevant content to employees based on department, job duties and personal preferences
- Sign in to a single, secure platform to access information and connect with colleagues
- Access information from any channel or device

Enable
